Summary

Salesforce Developer with 3 years of hands-on experience in Sales Cloud, Service Cloud, and Experience Cloud, specializing in Apex development, Lightning Web Components, and Salesforce automation. Proficient in building bulkified Apex logic, LWCs with wire service and custom events, record-triggered and scheduled Flows, REST API integrations, and Agentforce configurations. Experienced in Salesforce administration including security model, validation rules, approval processes, and reporting. Skilled in CI/CD deployments using Copado, with a strong focus on code quality, test coverage, data integrity, and stable production releases.

Experience

LTM

Sep 2023 – Present

Salesforce Developer - Manufacturing Domain

Bengaluru, India

- Designed and implemented bulkified Apex classes and triggers to enforce business rules and data integrity, following trigger framework patterns and governor limit best practices, reducing data-related production issues by ~30%.
- Built record-triggered and scheduled Flows to automate business processes including case escalations, approval notifications, and field updates — cutting manual operational effort by 40+ hours per month.
- Developed Lightning Web Components using @wire decorators, Lightning Data Service, custom events, and @AuraEnabled Apex methods for dynamic, reusable UIs — improving user efficiency and reducing manual data handling by ~20%.
- Optimized and refactored Apex logic to improve governor limit handling, reduce SOQL queries inside loops, and ensure transaction stability in high-volume production environments.
- Configured Experience Cloud sites including page customization, external user access, and data visibility using profiles, permission sets, permission set groups, and sharing rules.
- Created and maintained Apex test classes with structured test data factories, maintaining code coverage above 85% across all classes and reducing post-release defects.
- Supported CI/CD deployments using Copado and Opsera across Dev, QA, UAT, and Production pipelines, contributing to a 95%+ deployment success rate and zero critical rollbacks.
- Investigated and resolved production issues through root cause analysis, debug log review, regression testing, and post-deployment validation within Agile/Scrum teams.

Skills

- **Salesforce Technologies:** Apex • Async Apex • Triggers • LWC • Flows • SOQL/SOSL • Security Model • Reports & Dashboards • REST APIs • Agentforce
- **Salesforce Clouds:** Sales Cloud • Service Cloud • Experience Cloud
- **DevOps & Version Control:** Git • Copado • Opsera • Salesforce CLI • CI/CD • GitHub & Bitbucket
- **Tools:** Jira • Data Loader • Workbench • VS Code • Salesforce Inspector • Postman

Certifications

- **Salesforce**

- Salesforce Certified Platform Developer I Credential ID: 4812284
- Salesforce Certified Platform App Builder Credential ID: 6126892
- Salesforce Certified Administrator Credential ID: 4636386
- Salesforce Certified Agentforce Specialist Credential ID: 6755169

- **Copado**

- Copado Certified Fundamentals I MP Credential ID: 046440
- Copado Certified Fundamentals I SFP Credential ID: 047882
- Copado Certified Fundamentals II MP Credential ID: 047682
- Copado Certified Fundamentals II SFP Credential ID: 048141
